

Geophysics Department Seminar

**Geophysics’
“Indiana Jones” discovers
ancient monuments of
America’s earliest**

**civilization buried for 3,000
years in the jungles of Mexico**

**Sheldon Breiner, BS, MS, PhD,
Geophysics, Stanford, will
present an talk on a project he
directed using geophysics to find
colossal Olmec heads and other
carved basalt and other objects
buried in the ground in the
lowlands of Southern Mexico.**

**Using a magnetometer,
he conducted a survey
to detect and excavate
over 100 carved stone
objects now in museums
throughout Mexico.**
