

# Table of Contents

## Chapter 1: Introduction

|  |  |
|--|--|
| 1.1 What is the Value of Information?.....           |  |
| 1.2 Motivating Examples from the Earth Sciences..... |  |
| 1.3 Contributions of this Book.....                  |  |
| 1.4 Organization.....                                |  |
| 1.5 Intended Audience and Prerequisites.....         |  |
| 1.6 Bibliographic Notes .....                        |  |

## Chapter 2: Statistical Models and Methods

|   |  |
|---|--|
| 2.1 Uncertainty Quantification, Information Gathering and Data Examples ..... |  |
| 2.2 Notation and Probability Models .....                                     |  |
| 2.2.1 Univariate probability distributions .....                              |  |
| 2.2.2 Multivariate probability distributions .....                            |  |
| 2.3 Conditional Probability, Graphical Models and Bayes' Rule.....            |  |
| 2.3.1 Conditional probability .....   |  |
| 2.3.2 Graphical models .....  |  |
| 2.3.3 Bayesian updating from data .....                                       |  |
| 2.3.4 Examples.....   |  |
| 2.4 Inference of Model Parameters.....  |  |
| 2.4.1 Maximum likelihood estimation .....                                     |  |
| 2.4.2 Examples.....   |  |
| 2.5 Monte Carlo Methods and Other Approximation Techniques .....              |  |
| 2.5.1 Analysis by simulation.....   |  |
| 2.5.2 Solving integrals .....   |  |
| 2.5.3 Sampling methods.....   |  |
| 2.5.4 Example .....   |  |
| 2.6 Bibliographic Notes .....   |  |

## Chapter 3: Decision Analysis

|   |  |
|---|--|
| 3.1 Background .....                                    |  |
| 3.2 Decision Situations: Terminology and Notation.....  |  |
| 3.2.1 Decisions, uncertainties and values .....         |  |
| 3.2.2 Utilities and certain equivalent .....            |  |
| 3.2.3 Maximizing expected utility .....                 |  |
| 3.2.4 Examples.....                                     |  |
| 3.3 Graphical Models.....                               |  |
| 3.3.1 Decision trees.....                               |  |
| 3.3.2 Influence diagrams.....                           |  |
| 3.3.3 Examples.....                                     |  |
| 3.4 Value of Information.....                           |  |
| 3.4.1 Definition .....                                  |  |
| 3.4.2 Perfect versus imperfect information.....         |  |
| 3.4.3 Relevant, material and economic information ..... |  |
| 3.4.4 Examples.....                                     |  |
| 3.5 Bibliographic Notes .....                           |  |

## Chapter 4: Spatial modeling

|   |  |
|---|--|
| 4.1 Goals of Stochastic Modeling of Spatial Processes.....            |  |
| 4.2 Random Fields, Variogram and Covariance .....                     |  |
| 4.3 Prediction and Simulation.....                                    |  |
| 4.3.1 Spatial prediction and Kriging .....                            |  |
| 4.3.2 Common geostatistical stochastic simulation methods.....        |  |
| 4.4 Gaussian Models.....  |  |
| 4.4.1 The spatial regression model .....                              |  |
| 4.4.3 Optimal spatial prediction for Gaussian model : Kriging.....    |  |
| 4.4.4 Multivariate hierarchical spatial regression model .....        |  |
| 4.4.5 Examples.....   |  |
| 4.5 Non-Gaussian Response Models and Hierarchical Spatial Models..... |  |
| 4.5.1 Skew normal models.....   |  |
| 4.5.2 Spatial generalized linear models .....                         |  |
| 4.5.3 Example .....   |  |
| 4.6 Categorical Spatial Models.....                                   |  |
| 4.6.1 Indicator random variables .....                                |  |

|       |  |
|-------|--|
| 4.6.2 | Truncated Gaussian and pluri-Gaussian models ..... |
| 4.6.3 | Categorical Markov random field models .....       |
| 4.6.4 | Example .....                                      |
| 4.7   | Multiple-Point Geostatistics.....                  |
| 4.7.1 | Algorithms .....                                   |
| 4.7.2 | Example .....                                      |
| 4.8   | Bibliographic Notes .....                          |

## **Chapter 5: Value of Information in Spatial Decision Situations**

|       |   |
|-------|---|
| 5.1   | Introduction.....   |
| 5.1.1 | Spatial decision situations.....                                  |
| 5.1.2 | Information gathering in spatial decision situations .....        |
| 5.1.3 | Overview of models.....   |
| 5.2   | Value of Information: A Formulation for Static Models .....       |
| 5.2.1 | Prior value.....  |
| 5.2.2 | Posterior value .....   |
| 5.2.3 | Special cases: An overview .....                                  |
| 5.3   | Special Case: Low Decision Flexibility and Decoupled Value .....  |
| 5.3.1 | Prior value.....  |
| 5.3.2 | Posterior value .....   |
| 5.3.3 | Computational notes .....   |
| 5.3.4 | Example .....   |
| 5.4   | Special Case: High Decision Flexibility and Decoupled Value ..... |
| 5.4.1 | Prior value.....  |
| 5.4.2 | Posterior value .....   |
| 5.4.3 | Computational notes .....   |
| 5.4.4 | Examples.....   |
| 5.5   | Special Case: Low Decision Flexibility and Coupled Value.....     |
| 5.5.1 | Prior value.....  |
| 5.5.2 | Posterior value .....   |
| 5.5.3 | Computational notes .....   |
| 5.5.4 | Example .....   |
| 5.6   | Special Case: High Decision Flexibility and Coupled Value .....   |
| 5.6.1 | Prior value.....  |
| 5.6.2 | Posterior value .....   |

|  |  |
|--|--|
| 5.6.3 Computational notes .....            |  |
| 5.6.4 Example .....                        |  |
| 5.7 More Complex Decision Situations ..... |  |
| 5.7.1 Generalized risk preferences .....   |  |
| 5.7.2 Additional constraints .....         |  |
| 5.7.3 Sequential decision situations ..... |  |
| 5.8 Sequential Information Gathering.....  |  |
| 5.9 Other Information Measures .....       |  |
| 5.9.1 Entropy.....                         |  |
| 5.9.2 Prediction variance.....             |  |
| 5.9.3 Prediction error .....               |  |
| 5.10 Bibliographic Notes .....             |  |

## **Chapter 6: Earth Sciences Applications**

|   |  |
|---|--|
| 6.1 Workflow .....  |  |
| 6.2 Exploration of Petroleum Prospects.....                                   |  |
| 6.2.1 Gotta get myself connected – Bayesian network example.....              |  |
| 6.2.2 Basin street blues – Basin modeling example.....                        |  |
| 6.2.3 Risky business – Petroleum prospect risking example .....               |  |
| 6.3 Reservoir Characterization from Geophysical Data .....                    |  |
| 6.3.1 Black gold in a white plight – Reservoir characterization example ..... |  |
| 6.3.2 Reservoir dogs – Seismic and electromagnetic data example .....         |  |
| 6.4 Mine Planning and Safety .....  |  |
| 6.4.1 I love rock and ore – Mining oxide grade example .....                  |  |
| 6.4.2 We will rock you – Rock hazard example .....                            |  |
| 6.5 Groundwater Management.....   |  |
| 6.5.1 Salt water wells in my eyes – Groundwater management example.....       |  |
| 6.6 Bibliographic Notes .....   |  |

## **Chapter 7: Problems and Projects**

|   |  |
|---|--|
| 7.1 Problem and Tutorial Hands-on Projects .....                  |  |
| 7.1.1 Problem sets .....  |  |
| 7.1.2 Hands-on projects .....                                     |  |
| 7.2 Hands-on: Exploration of Petroleum Prospects .....            |  |
| 7.2.1 Gotta get myself connected – Bayesian network example ..... |  |

- 7.2.2 Basin street blues – Basin modeling example.....
- 7.2.3 Risky business – Petroleum prospect risking example .....
- 7.3 Hands-on: Reservoir Characterization from Geophysical Data.....
- 7.3.1 Black gold in a white plight – Reservoir characterization example .....
- 7.3.2 Reservoir dogs – Seismic and electromagnetic data example .....
- 7.4 Hands-on: Mine Planning and Safety .....
- 7.4.1 I love rock and ore – Mining oxide grade example .....
- 7.4.2 We will rock you – Rock hazard example .....
- 7.5 Hands-on: Groundwater Management.....
- 7.5.1 Part I: Salt water wells in my eyes – Groundwater monitoring in Netica .....
- 7.5.2 Part II: Salt water wells in my eyes – Groundwater monitoring in BNT .....
