

GES 191: Field Trip to Catalina Island and Southern CA

Sunday, March 25 - Thursday, March 29 (Spring Break)

During this spring break trip to sunny Southern California we will examine geologic evidence for the middle Miocene rifting of the Los Angeles basin and the southern California borderland. The trip will include three days on Catalina Island during which we will observe the exhumed mid-Cretaceous subduction complex and middle Miocene volcanic rocks related to rifting. **Instructors: Marty Grove and Sara Cina**

- Camping?
- Hiking?
- Beaches?
- Geology?

Open to anyone!

Participation limited to 15

Cost \$100 (includes ferry, camping and 2 dinners)

1 unit of credit available during Spring Quarter

Come to Catalina—it's the schist!
